

Connection Instructions

[Download MySql Workbench here.](#)

Add a new connection from this plus sign:

Enter the following info (also depicted below):

Hostname: 52.24.211.149

Username: read-only

A screenshot of the "Manage Server Connections" dialog box in MySQL Workbench. The "Connection" tab is selected. The "Connection Name" field contains "insight-analyst-assesment". The "Connection Method" is set to "Standard (TCP/IP)". The "Parameters" sub-tab is active, showing fields for "Hostname" (52.24.211.149), "Port" (3306), "Username" (read-only), "Password" (with "Store in Keychain ..." and "Clear" buttons), and "Default Schema". Help text is provided for each field.

Manage Server Connections

Connection Name:

Connection Method: Method to use to connect to the RDBMS

Parameters SSL Advanced

Hostname: Port: Name or IP address of the server host - and TCP/IP port.

Username: Name of the user to connect with.

Password: The user's password. Will be requested later if it's not set.

Default Schema: The schema to use as default schema. Leave blank to select it later.

When prompted, enter the password: 8jueKdPs*UZ4#zwv
